SKILLS

Programming: C++, C#, Python, Java (quick to pick up new languages).

Engines: Unity, Unreal Engine.

Gameplay & Systems: gameplay programming, systems/game design, UI/HUD, basic AI (FSM/BT), input & camera, cinematics, environment layout, VR, multiplayer & networking, Git.

Soft skills: problem solving, clean code, teamwork with artists/designers.

LANGUAGES

English – Native/Bilingual
(Cambridge IGCSE First Language English)

Spanish – Native/Bilingual
(Cambridge IGCSE First Language Spanish)

Catalan – Native Comprehension
(CEFR – B2)

German – Conversational
(Cambridge IGCSE German)

Japanese – Beginner
(self-study; >1-year daily streak — aiming for JLPT N5)

CERTIFICATIONS

C++ Programming & Unreal Game Development
iD Tech Camps
2019

C# & Unity Game Development Program
Game Experience Los Angeles
2018

PROFILE

Computer Scientist and Video Game Developer (Double B.Sc.) with a strong programming foundation (C++, C#, Python, Java...) and hands-on experience in Unity and Unreal Engine. I enjoy solving complex problems, designing game systems, and implementing them to a high standard. Passionate about gameplay feel, gameplay logic, level and environment design, technical design and learning fast, also curious about anti-cheat and cybersecurity.

EDUCATION

Double Degree in Computer Science and Video Game Development

Universidad Europea, Madrid

Jan 2022 – Jun 2027

Ethical Hacking Club · 8 High Honors · up to 84 ECTS/year.

Computer Science (Cyber Security)

University of Kent, Canterbury

Sep 2021 – Dec 2021

Transferred to a games-focused double degree after significant overlap with A-Levels CS (top grade), seeking a greater challenge.

A-Levels / IGCSE (British curriculum)

Morna International College, Ibiza

Sep 2006 – Jun 2021

A* in Computer Science (Cambridge International A-Levels).

PROJECTS & HIGHLIGHTS

Game Jams – Winner (Band Fusion)

Universidad Europea, Madrid

- 1st place (Band Fusion - 2025) and 2nd (Nature appliances - 2024) at on-site university jams; team of two among mostly 4+ member teams.
- I owned programming and engine integration; co-designed the core loop. Project later showcased at Río Babel Music Festival and Japan Weekend.
- Extra (ethical hacking): Won fastest to complete the Hackr0cks 3 days CTF (2026).

Unity/Unreal Prototypes

Prototyping of gameplay mechanics, state-machine AI, UI/HUD flows, Virtual Reality and multiplayer fundamentals (client-server, basic replication, lobby/session), alongside cinematics and environment layout/lighting.

Bots, AI Agents (MLP) & Small Tools

Side projects that strengthened debugging, clean code, and problem-solving discipline.

- ✓ **Availability:** Internships starting **September 2026**
- ✓ **Work authorization:** Spanish/EU citizen — no visa required
- ✓ **Target roles:** Technical Game Designer · Gameplay Programmer · Technical Level Designer (Unity/UE; adaptable to proprietary engines)
